About Re Sustainability

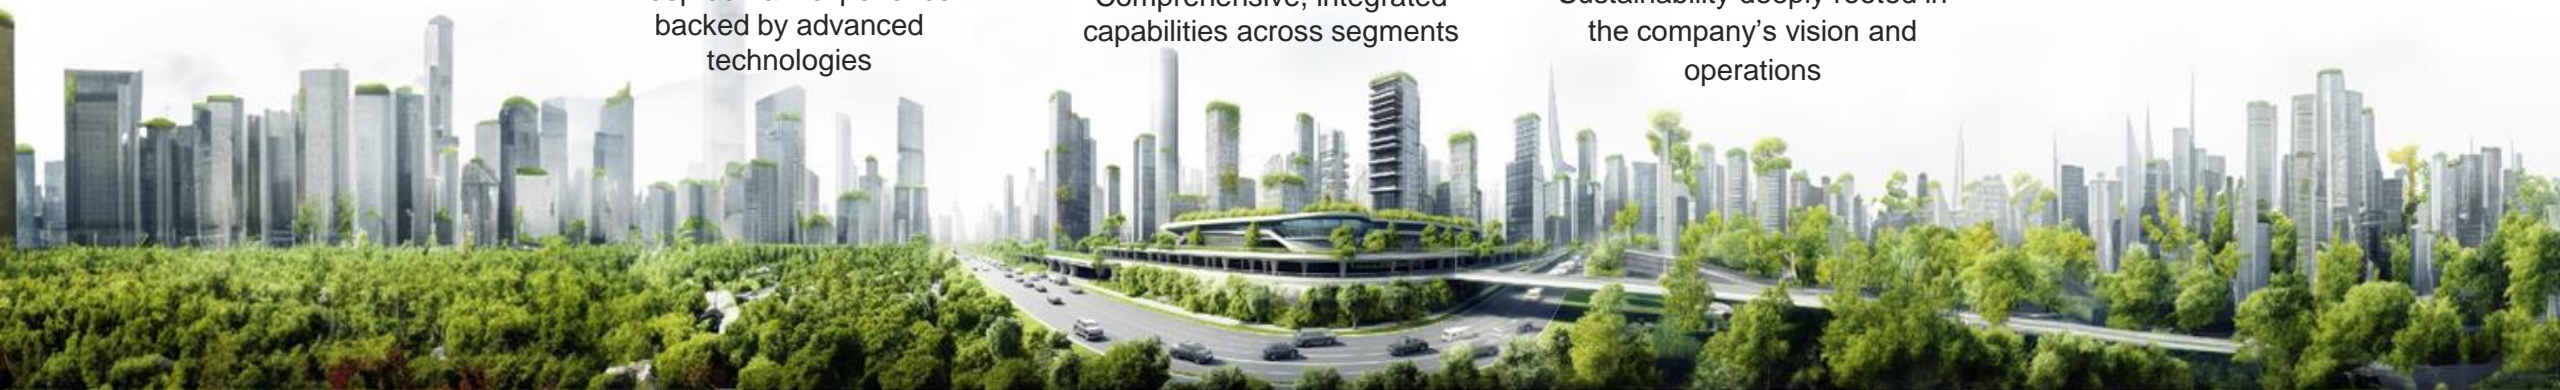

Deep domain experience backed by advanced technologies

Comprehensive, integrated capabilities across segments

Sustainability deeply rooted in the company's vision and operations

About Re Sustainability

Industrial Services

1. Common Hazardous Waste Facilities
2. Common Wastewater Treatment Facilities
3. O&M of captive environmental infrastructure for industries
4. Site Remediation Solutions
5. Domestic hazardous waste management services
6. AFR & Reignite - resource recovery and waste-to-value
7. Specialised Industrial Services

Healthcare Services

1. Common Bio-medical Waste Facilities
2. Sanitary waste management services
3. Recyclables and consumables
4. Facility management and other O&M services

Circular Economy Solutions

1. E-waste and precious metal recovery
2. Plastic recycling solutions
3. Re Carma (End-of-Life Vehicle management)
4. Construction and demolition (C&D) waste management
5. Used Oil recycling
6. Re Collect and other circular economy solutions
7. Solar panel and battery recycling**

Integrated Sustainability Solutions

1. ReAnalytical & ReAssure services
2. Consulting and permitting services
3. Environmental infrastructure design and EPC services
4. Remediation and DDD services
5. Net Zero solutions and EPR credit platform

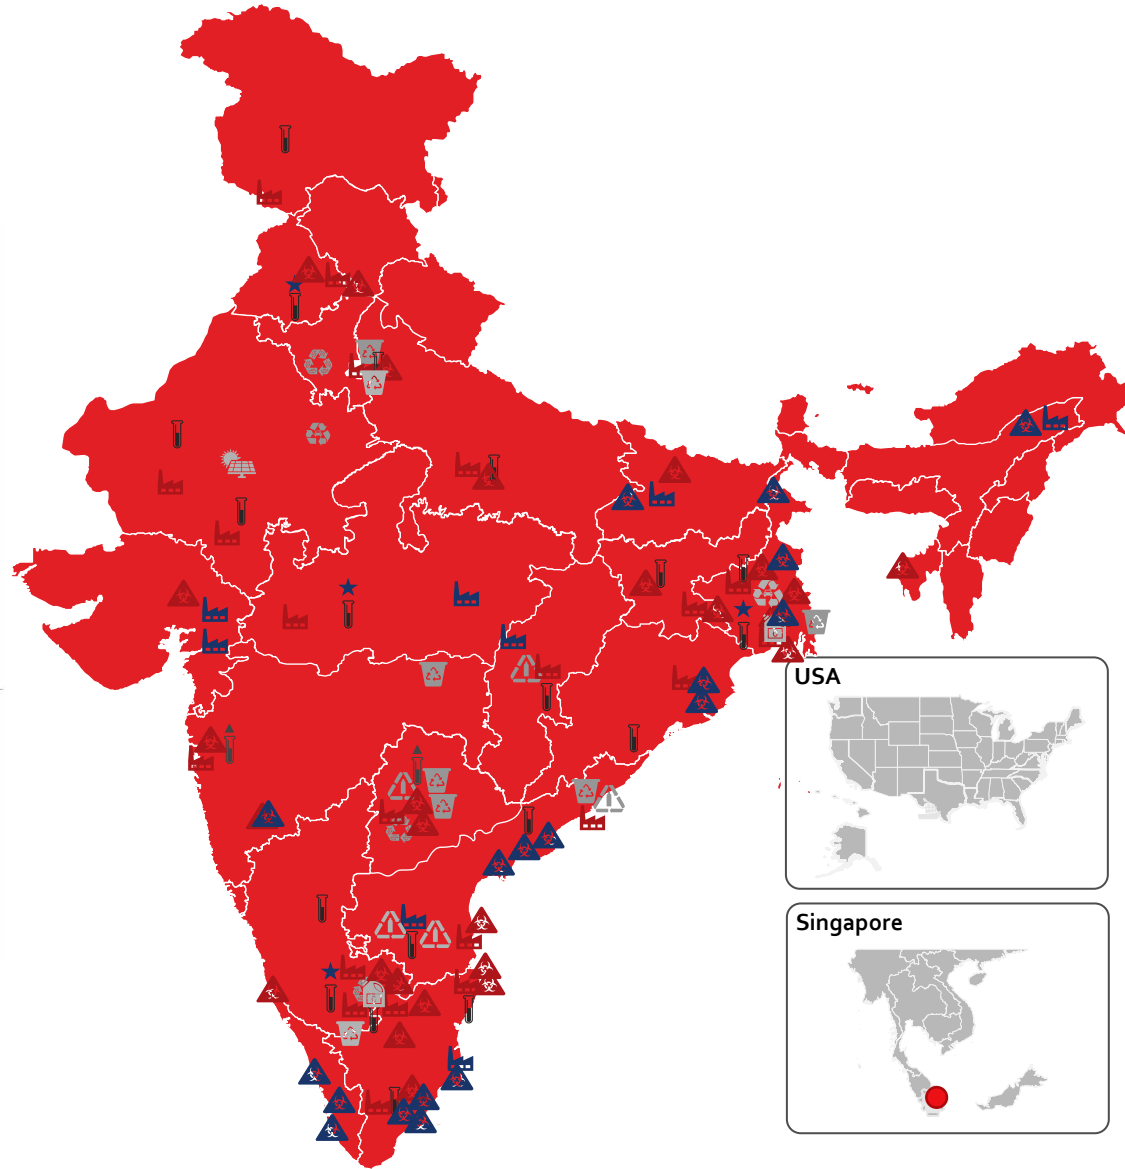

International Operations

- Singapore:** Waste management: recycling; facility management
- USA (NEMS):** MARPOL and associated services

Sustainability

-  Industrial waste facility / CHW
 -  Bio-medical waste fac. / CBW
 -  Plastic recycling facilities
 -  C&D recycling facilities
 -  PMR facilities
 -  ELV recycling facilities
 -  Re-Ignite
 -  Waste Water
-
-  NEMS operations
 -  Diversified services
 -  Analytical testing labs
 -  Center of excellence
 -  Hub labs

India's most extensive licensed portfolio of environmental services with 70+ operating facilities.

30+ under-execution facilities, 20+ pipeline sites to further consolidate leadership

59,000+ active clients, with resilient long-term relationships and contracts

Leveraging US MARPOL platform to expand in Singapore, SEA, and India

Experienced execution team of 5,000+ employees

Partnerships

A Transformative Joint Venture
Driving India's Plastic Recycling Revolution

Re Sustainability x Aarti Circularity's collaboration marks a milestone in sustainable resource management. India's first JV for Plastic Materials Recycling Facilities (PMRFs) aims to recover 500+ TPD of resources by 2030, pioneering advanced circular materials, reducing reliance on virgin resources, and accelerating India's transition to a circular economy.

Mr. Masood Mallick,
Managing Director & CEO of Re Sustainability

This collaboration between Aarti Circularity and Re Sustainability is a pathbreaking development that combines innovation with sustainability. Through this JV, we aim to revolutionize plastic recycling in India, reduce reliance on virgin resources, and foster a circular economy, minimizing environmental impact.

Mr. Mirik Gogri,
Director- Aarti Circularity Limited

Used Oil Recycling

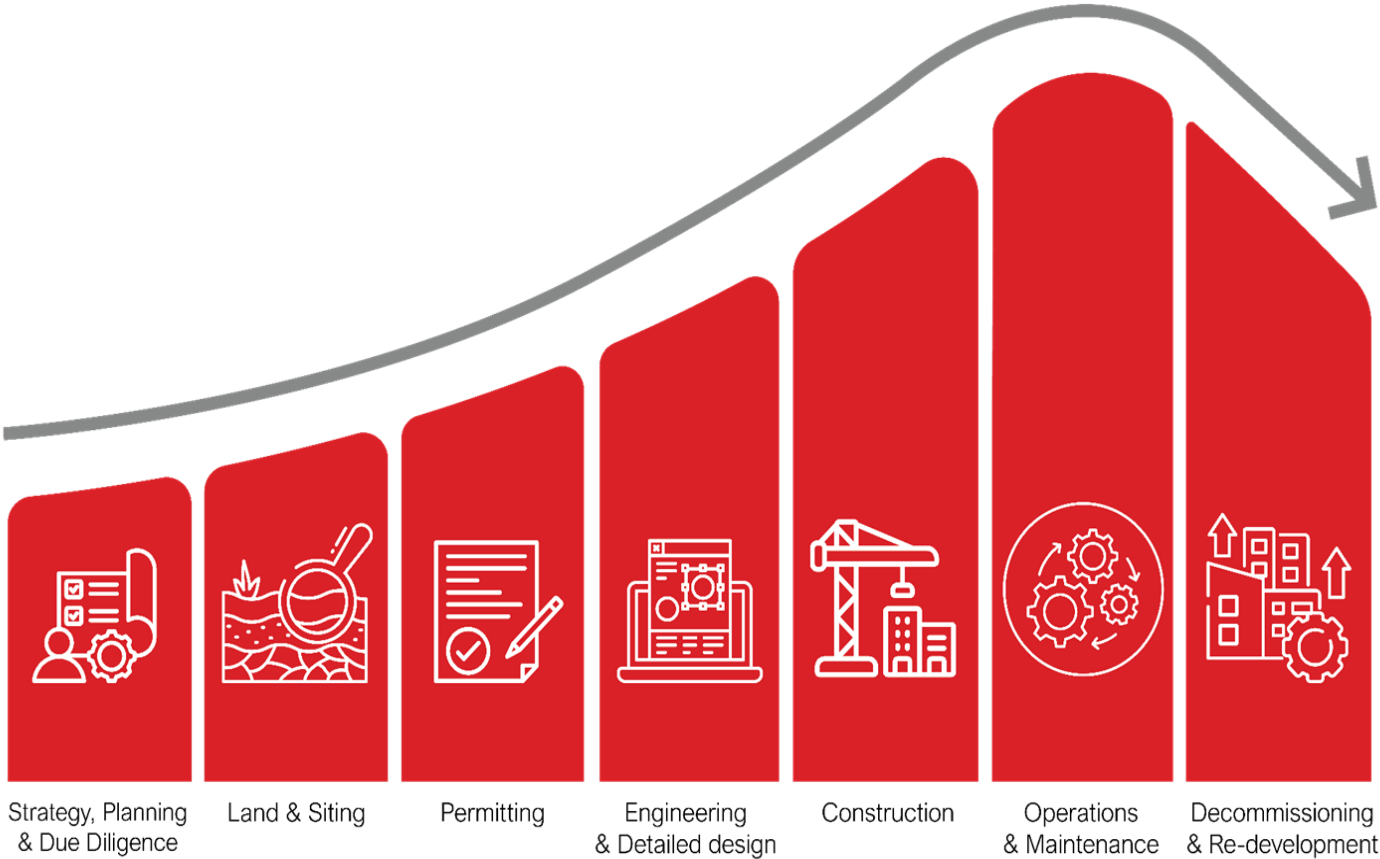

Strategic Partnership for Re-Refined Base Oil

- MoU signed with Indian Oil Corporation Limited to develop India's first structured national ecosystem for collection and recycling of used lubricating oil.
- Initiative will establish a nationwide collection and reverse logistics network to recover used lubricants from industrial and automotive sectors and convert them into Re-Refined Base Oil (RRBO).
- 100 KTA target annual collection of used oil and development of a state-of-the-art re-refining facility with 50–100 KTA capacity.
- The partnership will also support recycling of plastic lubricant containers under EPR regulations, strengthening responsible lifecycle management of lubricant packaging.
